- Ä Example: An employee worked 35% of their time on electric jobs, 30% on water jobs, 20% on sewer jobs and 15% on municipal nonutility jobs. The FTE by industry would be .35 for electric, .30 for water and .20 for sewer.

Return on Rate Base Computation

- Ä The data used in calculating rate base are averages.
- Ä Calculate those averages by summing the first-of-year and the end-of-year figures for each account and then dividing the sum by two.
- Ä For municipal utilities, do not include contributed plant in service, property held for future use, or construction work in progress with utility plant in service. These are not rate base components.
- Ä For private utilities, do not include property held for future use, or construction work in progress with utility plant in service. These are not rate base components.

- ⌘ An "other tax rate" is included in the "Net Local and School Tax Rate Calculation" to the extent that it is local. An example is a local library tax. Fully explain the rate in the Property Tax Equivalent schedule footnotes.
- ⌘ **Property Tax Equivalent - Total**
If the municipality has authorized a lower tax equivalent amount, the authorization description and date of the authorization must be reported in the schedule footnotes. If the municipality has NOT authorized a lower amount, leave the cell blank.

Water Property Tax Equivalent - Detail (Page W-07)

If Other Tax Rate - Local and/or Other Tax Rate - Non-Local are greater than zero, please explain.

The Village had another tax levy imposed to support the water utility.

Water Property Tax Equivalent - Total (Page W-07)

Lower Tax Equivalent authorized by municipality is greater than or equal to zero, please explain.

The Village Board has authorized a lower tax equivalent to be paid annually rather than using the computed tax equivalent.
